

## THERAPEUTIC AREA

## TREATMENT APPROACH

## INDICATIONS OF INTEREST

Lymphomas & B-Cell Malignancies

Inhibit tumor proliferation governed by EZH2 expression

- DLBCL
- MCL
- MM
- Other B-cell malignancies

Molecularly Defined Solid Tumors

Inhibit abnormal EZH2 function, restoring cells to natural state

- Chordoma
- Melanoma
- Mesothelioma
- Tumors with SWI/SNF alteration

Chemo/Treatment-Resistant Tumors

Re-sensitize tumors to chemo and other therapies (e.g., PARP)

- Small cell lung cancer
- Castration-resistant prostate cancer
- Other PARPi-resistant tumors

I/O Sensitive Tumors

Re-sensitize tumors to immuno-oncology therapies

- Small cell lung cancer
- Prostate cancer
- Other I/O sensitive tumors
